
PENNINGTON

1STEP™

For Bermudagrass Areas

YOU'LL SOON SEE THE 1 STEP™ DIFFERENCE!

Pennington 1 Step™ makes it easy to grow beautiful, thick, water-saving grass. Everything you need is pre-mixed and ready to use all in one easy bag. Simply apply, water and watch as grass like super drought-resistant seashore paspalum forms and maintains moisture around the roots while providing the essential nutrients it needs to grow healthy thick grass.

Pennington® Grass™

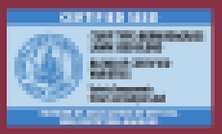
Ordinary Seed™

Pennington 1 Step™ grows **80% THICKER WITH HALF THE WATER** than ordinary grass seed™ during the critical germination period.

Pennington's Patented™ seed maximizer protects the seed from deadly fungus to give it a better chance to grow.

You Have Our Word

All of Pennington® The grass seed people™. Cultivating your grass for three generations by providing the finest grass seed you can buy.



PLANTING SPECIFICATIONS

PLANTING RATE: 1 lb. per 20 sq. ft. (45 g per 1 sq. m.) Coverage

PACKAGE COVERS UP TO: 500 sq. ft. (50 sq. m.) Coverage

Planting Distance: 1/2"	**Traffic Tolerance:** Excellent
Seedling Emergence: 7-21 Days	**Drought Tolerance:** Excellent
Light Required: Full Sun	**Recommended Mowing Height:** 1-1½"

Thick, Healthy Grass - Guaranteed!

1. PREPARE

Remove debris, then rake the soil to loosen and smooth the top layer.

2. APPLY

Spread seeding mix. No more than 1/8" thick everywhere. Healthy, beautiful grass in 3 weeks.

3. WATER (Most important Step)

Keep the soil moist! Water daily (twice a day if you have hot soil) until grass sprouts and reaches about 1-1½" tall. Mature lawns darken when it's properly watered. If it's light green, add more water.

ADDITIONAL CARE TIPS

- Mow your grass to 1/3 taller than the recommended mowing height you may begin mowing it.
- Avoid removing more than 1/3 of the total grass blade length at any single mowing to keep your grass thick and healthy.
- Increase your mowing height in summer months to reduce grass stress.

IMPORTANT: Applying weed control products or grass prior to seeding can affect the seeds' ability to grow. Be sure to read and follow all manufacturer's recommendations and applicable state restrictions prior to applying any weed control products and prior to seeding. Additionally, do not apply any weed control products to newly seeded areas until the grass is established and has been mowed at least 3 or 4 times. Once newly seeded areas are established, you can begin a regular weeding schedule.

ESPECIFICACIONES DE SIEMBRA

Índice de Siembra: 1 lb. por 20 pies cuadrados (área de 45 g por 1 m²)

El Paquete Cubre: 500 pies cuadrados (área de 50 m²)

Profundidad de Semillas: 1/2"

Germinación de Plantas: 7-21 días

Luz Requerida: Pleno Sol

Tolerancia al Tráfico: Excelente

Tolerancia a la Sequía: Excelente

Altura de Corte Recomendada: 1-1½"

Césped Denso Y Saludable – Garantizado!

1. PREPARE

Remueva escombros, después nivele la superficie para alisar la capa superior.

2. APLIQUE

Propague la mezcla de semillas no más de 1/8" de profundidad en cualquier área. Césped denso saludable en 3 semanas.

3. RIEGUE (El Paso más importante)

Mantenga el suelo húmedo! Riegue diariamente (dos veces al día si es necesario) hasta que los retoños crezcan 1-1½" de altura. Los céspedes sanos se ponen verdes cuando se riegan correctamente. Si es de color verde claro, hay que agregar más agua.

The Pennington® Guarantee

If you, the consumer, are not satisfied with this product after use in accordance with package directions, you may be eligible for a refund. Send original receipt, empty packaging and a brief explanation of the reason for your purchase. Upon verification, we will send you a refund check for the purchase price.
